

Nahid Ibrahimov

Backend Developer

Hi, there! Web development is the only job I never get tired of. In every opportunity I try to develop myself in this lovely area. My aim is to be one of the people remembered when one talks about "Full Stack Web Development". I do not like to fill my resume with lots of useless information to make it "rich". So I added the only ones which in my opinion are important. In case you have other questions need to be answered, feel free to contact and talk more when you are available. Have a good day! Hope to hear from you soon!
